

**■ GEBERIT**

Water- and space saving:  
Kombifix and Duofix Systems

Bathroom design is changing, and as a result, consumers are no longer bound to the constraints of the traditional exposed cistern and floor standing WC. Geberit's installation systems Duofix and Kombifix herald

the advent of modern bathroom design, utilising wall hung technology, and with it, the design freedom to provide solutions in even the smallest of rooms.

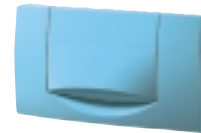

## ■ GEBERIT

Effortless and simple to use, Geberit's dual flush system "Twinline" with 3/6 litre or the "flush/stop" function of the flush actuators "200 F" and "Highline" bring real savings in household water consumption. Incorporating a silent filling valve, Geberit installation systems save water not only efficiently, but also incredibly quiet.
