

 **GEBERIT**

Geberit AquaClean
The WC that cleans you with water.

At the heart of your bathroom: well-being.

Water possesses qualities which have a noticeable effect on our well-being: it refreshes, revitalises, cleanses. Geberit AquaClean goes one step further. You will not just be captivated by the water alone but also by the sophisticated spray principle, combined with specific individual functions.

Discover a new kind of personal hygiene that is gentle, natural, and good for you: with Geberit AquaClean – the toilet that cleans you with water.

Imagine you are fitting the bathroom of your dreams: what would you like? More relaxation, more comfort, more design? Then you will fall in love with Geberit AquaClean. Welcome to your new private mini-spa.

For all who place high value
on a good quality of life.

Geberit AquaClean is not a question of luxury but one of meeting the particular needs of your personal quality of life. How much comfort, how many functions, how much mobility you require – the choice is yours. All Geberit AquaClean models are characteristically practical, intelligent and easy to clean. And their design qualities will elicit many an envious glance.

The right model for every home.

You don't want to change your entire toilet but don't want to do away with comfortable cleanliness, either? Then an enhancement solution is perfect for you. The easy-to-fit seat brings a new level of comfort to your bathroom, from simple to luxurious.

You want to realise your bathroom according to your own ideas and brook no compromises? Then you will be delighted with a Geberit AquaClean complete solution. This integrated solution is likewise available across the spectrum, from simple to luxurious.

Geberit AquaClean 4000: Simple model, slender price.

The spray strength can be adjusted to suit individual preferences.

Simple assembly and disassembly also makes it ideal for rented accommodation.

The compact and elegant Geberit AquaClean 4000 gives you everything that is important for cleanliness and well-being: while you are sitting comfortably, a spray of water at body temperature washes you clean at the touch of a button and at a level of intensity that suits you. The control panel is self-explanatory and easily accessible. And, as with all Geberit AquaClean models, this one also comes with an automatic closing function: the seat and lid shut silently.

Geberit AquaClean 5000: Comfortable, compact design.

You set high standards when it comes to comfort, yet at the same time you want to set up your toilet quickly and easily? Then the Geberit AquaClean 5000 is just right for you.

The ergonomically designed enhancement solution turns any standard toilet into a zone of well-being. The Geberit AquaClean 5000 is easy to fit and offers useful additional functions: the oscillating jet cleans exceptionally thoroughly, and the automatic air-purification system means that lingering odours in the bathroom can now be regarded as a thing of the past.

As with all models, the spray nozzle is rinsed with clean water both before and after spraying.

A treat for all the senses: the air-purification system starts up as soon as you sit down.

Geberit AquaClean 5000*plus*: The multi-talent for top-level comfort.

Relaxing and effective if you are suffering from constipation: the pulsating massage spray.

The adjustable warm-air dryer rounds off the pampering programme.

Quick and easy to fit: if you are moving house, simply take the luxury enhancement solution with you.

All functions can be operated practically and in comfort thanks to the remote control.

This intelligent enhancement solution offers all the amenities you would expect from a toilet of the latest generation. It goes without saying that cleaning with water at body temperature, drying with a warm-air dryer and the essential air-purification system are included in this model.

Geberit AquaClean 5000*plus* combines all basic functions with some welcome additional features. These include the ladies' spray and the remote control feature. Everything conforms to your own personal requirements – the spray strength, temperature and dryer can all be individually adjusted.

Geberit AquaClean 8000: The design icon for discerning customers.

At first glance, it looks just like any modern toilet that captivates thanks to its elegance and the quality of its design. Yet the stylish ceramic unit is only the visual crowning glory – the Geberit AquaClean 8000 also stands out through the comfort afforded by its spray.

The wall-hung complete solution made from dirt-resistant ceramic is a winner across the entire line. The strength of the oscillating spray can be adjusted to suit the desired intensity. Naturally, the spray nozzle cleans itself automatically both before and after the toilet is used.

The spray can be adjusted to suit individual requirements and personal preferences.

Increased ease of operation is just as much part of the concept as experiencing the cleansing spray.

Geberit AquaClean 8000*plus*: The deluxe pampering programme.

The intensity, temperature and properties of the water spray can each be individually adjusted.

A treat for all the senses: the air-purification system starts up as soon as you sit down.

Drying yourself with warm air is wonderfully comfortable and is also kinder on your skin.

Fine-tune all functions to suit your preferences, save them and then retrieve them again and again.

This luxury complete solution will become the centrepiece of your bathroom: Geberit AquaClean 8000*plus* offers a unique well-being experience that matches its beautifully shaped design.

For a start, the pure spray of water provides unrivalled cleaning quality. Geberit AquaClean 8000*plus* has come up with more features than just this, however: the evenly oscillating spray and the pulsating massage function will increase your sense of well-being even further. Nor do you have to go without the comfort of the dryer or the ladies' spray. And it goes without saying that a remote control with storable user profiles is also included.
