SOLUTIONS FOR FLOOR-EVEN SHOWERS

CLEAN DRAINS
FLOOR-EVEN SHOWERING IS BOOMING

More and more customers want to have an open design in their showering area. Our systems for floor-even showering offer very individual solutions to fulfill these wishes. The Geberit trademark guarantees timeless design with respect to function and aesthetics, the best in quality and a unique know-how for drainage – with clear advantages for the sanitary engineer, the plumber and the customer.

Which solution suits your project? You will learn more about floor-even showering with Geberit on the following pages. We look forward to increasing your success with our know-how and our products.
There are good reasons to decide on a solution from Geberit for floor-even showers. Whether it involves a shower surface, wall drain, shower channel or floor drain, the assortment makes it possible to tailor the installation precisely to the building situation and the customer’s wish. The greatest challenge – the caulk – is perfectly prepared because the sealing foil is already integrated at the factory, thus making it a permanent component of the product. This saves time and cuts stress during installation, and minimises the risk of leaks.

Fine design from Geberit:
• High-quality and beautiful
• Reliable thanks to sealing foil integrated at the factory
• Simple handling from order to installation
• Integrated sound insulation
• For new construction and renovations
• Lean assortment with rapid delivery
• Easy to clean

Geberit shower surface Setaplano
Our smooth surface made of solid surface material

Geberit wall drain for showers
Our elegant design solution in the wall

Geberit floor drain for showers
Our compact design solution in the floor

Geberit shower channels of the CleanLine series
Our solution for elegant designer lines in the floor
The Geberit shower surface Setaplano is a captivating product from the very first glance – and the very first touch. Made of a high-quality solid surface material, it has a surface that feels silky-smooth and warm to the touch.

HIGH-QUALITY PRODUCT MATERIAL
In the Geberit shower surface Setaplano, the number of individual parts required for installation is kept to a minimum. With the steel frames and sealing foil preassembled at the factory, the work is made significantly simpler and a high level of safety is ensured.

SOPHISTICATED DESIGN
Not only is the Geberit shower surface Setaplano easy to install, it also offers tangible added value to the user. Solid surface material is highly resistant and non-porous, making it easy to clean. The drain area has been deliberately designed without edges where dirt can collect. What makes the shower surface especially easy to clean is the practical comb insert, which can be removed easily and cleaned as required.

- Small number of individual parts, ensuring easy installation
- Highly safe thanks to sealing foil integrated at the factory
- Robust, exceptionally non-slip product material
GEBERIT INSTALLATION FRAMES

PRECISION

RELIABILITY

EASY-TO-INSTALL TRAP
The trap is available in two models: one with a 30 mm depth of water seal and a discharge rate of 0.45 l/s, and one with a 50 mm depth of water seal and a discharge rate of 0.65 l/s. Both models can be snapped into the preassembled bracket and aligned by rotating 360°. Cleaning is a breeze, as the flexible water seal tray can be removed as a whole part.

STABLE AND SUITABLE FOR BUILDING SITES
The distinctive blue installation frame, made of powder-coated steel, is available in a range of sizes. Four to six feet are required for installation, depending on the size. The feet are simply clicked into place on the frame at the designated points.

SIMPLE ALIGNMENT – SECURE FASTENING
The feet can be aligned easily with the floor height using a standard tool, working from above. Once this is complete, sliders are used to secure them reliably in place.

- Preassembled, stable steel installation frame for easy installation
- The feet click into place on the frame in no time at all
- Precise trap placement thanks to integrated bracket
- Convenient height adjustment from above
The Geberit wall drain permits floor-even showering in pure form. Integrated behind the wall, it is outstanding not only for its elegance but also for its clear added value in terms of planning, installation and maintenance.

**DEVELOPED FOR OPTIMUM HYGIENE**
The Geberit wall drain for shower features an integrated comb insert which can be removed and washed out in no time at all. The cleaning of the shower floor is particularly simple with wall drains.

**WELL-THOUGHT-OUT ALL DOWN THE LINE**
The optionally installable collector profile directly in front of the wall supports the slope and collects dirt and deposits so that they can be readily washed away.

**NOT ONLY NEW CONSTRUCTIONS**
Particularly with high-quality properties, the Geberit wall drain for shower is an excellent answer to the design preferences of the customer. The potential for utilisation is more versatile than you might think: the system technology makes it possible to implement a wall drain, even with renovations and where available space is limited.

• Innovative solution for integration in prewall systems
• Clear separation of trades thanks to pipeline placement in the wall
• Optional collector profile for efficient and precise formation of the slope in the floor

**COLOURS / PRODUCT MATERIALS**
- Bright chrome-plated
- White alpine
- Stainless steel brushed
- Can be tiled according to preference
GEBERIT SHOWER CHANNELS
OF THE CLEANLINE SERIES

DESIGN SOLUTION
IN THE FLOOR

Geberit shower channels of the CleanLine series combine
elegant appearance with the easy installation of a floor drain.
In addition, the innovative system solves the hygiene problem
many shower channels have.

TOP DESIGN MADE EASY
Shower channels are very popular with their timeless
designer lines. Geberit shower channels of the
CleanLine series have another big advantage: thanks
to their innovative technology, they are very easy to
install – and just as easy to clean.

FLEXIBLE LENGTH AND PLACEMENT
Geberit shower channels of the CleanLine series can
be cut to length directly at the time of installation in
accordance with the individual showering area. The
design harmonises with any floor and can be placed
either close to the wall or in the middle of the shower
area.

DESIGNED FOR SIMPLICITY
AND CLEANLINESS
Shower channels are often difficult to clean. But not
Geberit shower channels of the CleanLine series:
the dirt flows off the collector surface perfectly. And
the comb insert can be removed and washed out in
no time at all.

• Unique design with collector surface, comb
  insert and trap and waste
• Uncomplicated and as reliable as a floor drain
• Extremely high customer satisfaction thanks
to simple cleaning and modern linear
appearance

GEBERIT FLOOR DRAIN FOR SHOWER

SIMPLE AND COMPACT

The Geberit floor drain for shower is the universal solution for floor-even showering with clear advantages: reduced design, ingenious function and simple installation.

BIG PERFORMANCE IN A SMALL PACKAGE

Wherever installation needs to be as simple as possible and costs kept as low as they can be, the Geberit floor drain is the best solution – and the most compact one as well, with only 80 × 80 mm grating area. Hidden under the grating are the great qualities that make Geberit one of the world’s leading providers of sanitary technology.

MAXIMUM REDUCTION AND PRECISION

The Geberit floor drain for shower convinces with its very compact construction (only 80 × 80 mm grating area) and with its very high functionality. The height, inclination and offset of the grating can be adjusted to suit the tile grid.

ALWAYS A CLEAN TRAP AND WASTE

Under the grating, there is an integrated comb insert which can be easily removed and washed out for cleaning. This effectively prevents clogging in the trap and waste and the discharge pipes.

- Intelligent details for uncomplicated installation
- Design grating made of solid stainless steel
- Simple cleaning thanks to integrated comb insert
